

SMITH KAMLESH GAJJAR

Mumbai, Maharashtra, India

✉ smith.gajjar@gmail.com  [linkedin.com/in/smithg09](https://www.linkedin.com/in/smithg09)  www.smithgajjar.dev  github.com/smithg09

Senior Software Engineer with 5+ years of experience across platform engineering, AI systems, and full-stack development. Led and shipped AI-powered products, developer platforms and tooling, GraphQL infrastructure, and customer-facing applications used by over 50M registered users across Codecademy and Skillsoft Percipio.

EXPERIENCE

Codecademy (Skillsoft)

Remote

Senior Software Engineer

Jan 2024 – Present

- Shipped Codecademy's Vibe Learning Platform, a learn-by-building product where AI agents generate full-stack projects, to **10M+ active learners in 2 months** by building a LangGraph-based agentic engine.
- Re-architected Codecademy's **GraphQL Federation** split into consumer and enterprise graphs in Golang with improved caching and isolated schemas, **cutting query latency by 40%** (500ms to 300ms).
- Tech lead for Skillsoft's **first AI-native Builder pod**, a 3-engineer team owning product development end-to-end that shipped 2 products in under 6 months, a model that **scaled into 11 more pods org-wide**.
- Co-developed Agentor, a shared agent framework library with multi-agent workflows, agent harness, MCP, guardrails and LLM evaluations, reducing new agent scaffolding for **5+ teams** and earning CTO recognition.
- Led migration of 1000+ videos to in-house infrastructure, shipping a **WCAG 2.1-compliant video player** in the Gamut Design System that improved accessibility and reduced load times via caching and HLS streaming.

Videoverse

Mumbai

Full Stack Developer

Oct 2023 – Dec 2023

- Integrated and managed multi-region payment systems (Stripe, Razorpay, PhonePe), improving checkout success rates and regional compliance.

Tekie (Acquired by UOLO)

Remote

Senior Full Stack Developer

Jun 2021 – Oct 2023

- Founding team engineer and backend/platform lead. Scaled a B2B and B2C EdTech platform serving **500k+ students across 1,000+ schools** with interactive coding curriculum.
- Built an internal GraphQL-based BaaS architecture, reducing API latency **from 2s to 300ms (~80% reduction)** via schema redesign, query optimization, and Redis caching.
- Led GraphQL and platform **team of 7 engineers**, established code review standards and CI checks that reduced review cycle time and caught regressions before production.
- Scaled production infrastructure across Managed Kubernetes, MongoDB, PostgreSQL, built CI/CD with GitHub Actions, integrated AWS S3, Elastic Transcoder, and CloudFront.

PROJECTS

Openplan (openplan.smithgajjar.dev)

- Golang CLI that intercepts an AI coding agent's like Claude Code plan step and opens browser UI to review, annotate, approve or deny the plan before any code is written, adding a human-in-the-loop review.

Devbox (devbox.smithgajjar.dev)

- Cross-platform developer toolbox bundling everyday utilities into a single offline app, reducing tool-switching overhead. Built with Tauri (Rust) and React.

Arcgentic - AI Learning Platform (arcgentic.smithgajjar.dev)

- An agentic learning platform that generates personalized content like deep dives, roadmaps, and podcasts from user-uploaded documents. Built with LangGraph, Python, Go, GraphQL and PostgreSQL.

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, Python, Go, GraphQL, Next.js, Node.js, React, Flask, Svelte, Angular.

Cloud & Databases: AWS, Kubernetes, PostgreSQL, MongoDB, Redis, Elasticsearch, RabbitMQ, Docker.

AI & LLM Frameworks: LangGraph, LangChain, A2A, agentic harness, RAG, LLM evaluations (LLM-as-judge).

Tools: Github Actions, Datadog, Sentry, New Relic, Jenkins, Grafana, OpenTelemetry, JMeter, Playwright, Jest.

EDUCATION

Bachelor of Engineering in Computer Science

2018 – 2021

Vivekanand Education Society's Institute of Technology

Mumbai, Maharashtra
